

Commercial Photography I

The ability to apply principles of visual literacy to produce visual content gives students an advantage in today's global, multimedia society. Students are taught industry-relevant technical skills and have the opportunity to work with a variety of technology, including digital cameras, design software and editing tools to stage, shoot, process, print and present professional-grade images. In addition, students evaluate and critique photographic work and investigate the history of photography, including (optionally) the fundamentals of film and darkroom development.

High School Credits: 1

School Level: High School

Grade: 11

Program: CTE: Trade and Industrial Education
