# AP Calculus BC

This AP course provides an intensive study of the calculus of functions of a single variable. Course content includes topics in infinite series and polar and parametric equations, as well as the topics covered in AP Calculus AB. The course represents college-level mathematics for which colleges may grant higher placement or credit to students who score well on the AP exam.

**High School Credits:** 1

**Note:**
    Students who enroll in AP courses must take the end-of-course AP exam. The cost of these exams is paid by ACPS.

**School Level:** High School

**Grade:** 10, 11, 12

**Prerequisites:**

Pre-Calculus

**Program:** Mathematics Core Courses
